

VA40 - Vehicle amplifier

PN (RN): 2410.100.01

Combining VA40 vehicle amplifier with RF40 handheld transceiver results in RF40V vehicle set. It is designed so that the transceiver is easily removable (Jerk and Run) and can be used as a portable radio, if necessary. MM40WR Mission Module can be connected to the set.

Operating features

- increasing RF40 rf power output to 50 W,
- compact and robust design suitable for wheeled and tracked vehicles,
- Jerk and Run support,
- vehicle intercom interface,
- 12 VDC or 24 VDC power supply,
- optionally up to two co-site filters (primarily for 30 MHz to 90 MHz tactical band),
- optional WaveRelay amplifier module.
